Revision History

| Name | Date | Reason For Changes | Version |
|--------------|----------------|--------------------|---------|
| Brendan Duke | Oct. 7th, 2016 | Initial Version | 0.0 |

1 Project Drivers

1.1 The Purpose of the Project

1.1.1 The User Business or Background of the Project Effort

1.1.2 Goals of the Project

1.2 The Client, the Customer, and Other Stakeholders

1.2.1 The Client

1.2.2 The Customer

1.2.3 Other Stakeholders

1.3 Users of the Product

1.3.1 The Hands-on Users of the Product

1.3.2 Priorities Assigned to Users

1.3.3 User Participation

1.3.4 Maintenance Users and Service Technicians

2 Project Constraints

2.1 Mandated Constraints

2.1.1 Solution Constraints

| | |
|--------------------------|---|
| Constraint Number | 0 |
| Constraint Type | 4a. Solution Constraint |
| Event/Use Case Numbers | Entire product. |
| Description | The Text-to-Motion Software Suite must run under Linux. |
| Rationale | Linux is the operating system used by the Guelph Machine Learning research lab, and also the most commonly used operating system in the research community. |
| Originator | Dr. Graham Taylor |
| Fit Criterion | Automated builds and testing should pass on popular Linux distributions: Ubuntu, Fedora and RHEL. |
| Customer Satisfaction | 5 |
| Customer Dissatisfaction | 5 |
| Priority | High priority. |
| Conflicts | None. |
| Supporting Materials | None. |
| History | Created September 26th, 2016. |

| | |
|--------------------------|---|
| Constraint Number | 1 |
| Constraint Type | 4a. Solution Constraint |
| Event/Use Case Numbers | Entire product. |
| Description | Major APIs to the Text-to-Motion database must be accessible from the Python programming language. |
| Rationale | Python is a popular, easy-to-use, and quick-to-prototype language, and is therefore one of the most favoured programming languages among the Machine Learning research community. |
| Originator | Dr. Graham Taylor |
| Fit Criterion | There must be hooks to all major interfaces written in Python, and there must be tests that are directly testing the Python interfaces. |
| Customer Satisfaction | 5 |
| Customer Dissatisfaction | 5 |
| Priority | High priority. |
| Conflicts | None. |
| Supporting Materials | None. |
| History | Created September 26th, 2016. |

| | |
|--------------------------|--|
| Constraint Number | 2 |
| Constraint Type | 4a. Solution Constraint |
| Event/Use Case Numbers | Human Pose Estimation Event. |
| Description | The human pose estimation component should use deep learning methods. |
| Rationale | This constraint is to allow Dr. Taylor's group to integrate the software into their existing text-to-motion pipeline |
| Originator | Dr. Graham Taylor |
| Fit Criterion | Dr. Taylor should confirm that the deep learning methods used in the human pose estimator are satisfactory. |
| Customer Satisfaction | 5 |
| Customer Dissatisfaction | 4 |
| Priority | High priority. |
| Conflicts | None. |
| Supporting Materials | None. |
| History | Created September 26th, 2016. |

2.1.2 Implementation Environment of the Current System

2.1.3 Partner or Collaborative Applications

2.1.4 Off-the-Shelf Software

2.1.5 Anticipated Workplace Environment

2.1.6 Schedule Constraints

2.1.7 Budget Constraints

2.2 Naming Conventions and Definitions

2.2.1 Definitions of All Terms, Including Acronyms, Used in the Project

Feedforward Neural Networks are artificial neural networks where connections between the units do *not* form a cycle). They are the simplest type of neural network, because information moves in only one direction.

ConvNets or **Convolutional Neural Networks** are a type of feed-forward artificial neural network. ConvNets are inspired by the visual cortex and are commonly used in visual recognition applications.

RNNs or **Recurrent Neural Networks** are a class of artificial neural networks where units form a directed cycle, in contrast with feed-forward neural networks.

Deep Belief Networks are a type of deep neural network composed of multiple layers of "hidden units" (variables that are not observable), with connections between layers but not between units of a given layer.

2.2.2 Data Dictionary for any Included Models

2.3 Relevant Facts and Assumptions

2.3.1 Facts

2.3.2 Assumptions

3 Functional Requirements

3.1 The Scope of the Work

3.1.1 The Current Situation

There is a large amount of existing research into human pose estimation, which this project will leverage. Based on constraint 2, we focus on existing solutions that use deep learning methods.

[1] present a ConvNet architecture for human pose estimation from videos, which is able to benefit from temporal context across multiple frames using optical flow. This work is focused on upper-body human pose estimation only.

[2] propose a ConvNet model for predicting 2D human body poses in an image. This model is able to achieve state-of-the-art results using a simple architecture, and draws on the work done in [1].

[3] introduces *Convolutional Pose Machines (CPMs)* for pose estimation in images. CPMs consist of a sequence of ConvNets that iteratively produce 2D belief maps.

3.1.2 The Context of the Work

3.1.3 Work Partitioning

3.2 The Scope of the Product

3.2.1 Product Boundary

3.2.2 Product Use-case List

3.2.3 Individual Product Use Cases

3.3 Functional and Data Requirements

3.3.1 Functional Requirements

| | |
|--------------------------|---|
| Requirement Number | 3 |
| Requirement Type | 9a. Functional Requirement |
| Event/Use Case Numbers | |
| Description | The text-to-motion software suite will provide an API to read individual frames in RGB format from a video stream. At least MP4, MP2 and AAC must be supported. |
| Rationale | Researchers may wish to do their own processing on RGB frames before feeding those frames into the human pose estimation module. |
| Originator | Brendan Duke. |
| Fit Criterion | For a given set of test video streams, the frame-capture API must produce RGB frames identical to known reference frames. |
| Customer Satisfaction | 3 |
| Customer Dissatisfaction | 3 |
| Priority | Moderate priority. |
| Conflicts | None. |
| Supporting Materials | None. |
| History | Created October 5th, 2016. |

3.3.2 Data Requirements

4 Nonfunctional Requirements

4.1 Look and Feel Requirements

4.1.1 Appearance Requirements

4.1.2 Style Requirements

4.2 Usability and Humanity Requirements

4.2.1 Ease of Use Requirements

4.2.2 Personalization and Internationalization Requirements

4.2.3 Learning Requirements

4.2.4 Understandability and Politeness Requirements

4.2.5 Accessibility Requirements

4.3 Performance Requirements

4.3.1 Speed and Latency Requirements

4.3.2 Safety-Critical Requirements

4.3.3 Precision or Accuracy Requirements

4.3.4 Reliability and Availability Requirements

4.3.5 Robustness or Fault-Tolerance Requirements

4.3.6 Capacity Requirements

4.3.7 Scaling of Extensibility Requirements

4.3.8 Longevity Requirements

4.4 Operational and Environmental Requirements

4.4.1 Expected Physical Environment

4.4.2 Requirements for Interfacing with Adjacent Systems

4.4.3 Productization Requirements

4.4.4 Release Requirements

4.5 Maintainability and Support Requirements

4.5.1 Maintenance Requirements

4.5.2 Supportability Requirements

4.5.3 Adaptability Requirements

15

4.6 Security Requirements

4.6.1 Access Requirements

4.6.2 Integrity Requirements

4.6.3 Privacy Requirements

4.6.4 Audit Requirements

5 Project Issues

5.1 Open Issues

5.2 Off-the-Shelf Solutions

5.2.1 Ready-Made Products

5.2.2 Reusable Components

5.2.3 Products That Can Be Copied

5.3 New Problems

5.3.1 Effects on the Current Environment

5.3.2 Effects on the Installed Systems

5.3.3 Potential User Problems

5.3.4 Limitations in the Anticipated Implementation Environment That May Inhibit the New Product

5.3.5 Follow-Up Problems

5.4 Tasks

5.4.1 Project Planning

5.4.2 Planning of the Development Phases

5.5 Migration to the New Product

5.5.1 Requirements for Migration of the New Product

5.5.2 Data That Has to Be Modified or Translated for the New System

5.6 Risks

5.7 Costs

5.8 User Documentation and Training

5.8.1 User Documentation Requirements

5.8.2 Training Requirements

5.9 Waiting Room

5.10 Ideas for Solutions
